LEADERSHIP PLANNING
As a leadership team, you may want to discuss the following items when choosing COPE as your program feature during your planning meetings.

- Where can we find a BSA COPE instructor to help us?
- What COPE facilities are available to us? Does our council have a course or a council COPE committee?
- How do we schedule time on a COPE course?
- How much will it cost to schedule time on the course?
- How far in advance do we need to make a reservation?
- What changes should we make to the sample meeting plans that would fit our needs better?

GAME AND CHALLENGE IDEAS

Library of Games and Challenges on Troop Program Resources

- Traffic Jam
  - Materials: Enough cloth, plywood, or cardboard squares for the members of each patrol, plus one additional square
  - Method: Place the squares an easy step from each other in a straight or slightly curved line. (A curved line lets participants better see what’s happening.) Two patrols face each other. One patrol stands on the squares to the left of the unoccupied center square; the other stands to the right. Both patrols face the middle. The challenge is for the patrols to switch sides, obeying the following rules:
    1) Scouts may move to an empty space in front of them; 2) Scouts may move around one person who is facing them to an empty space; 3) Backward moves are illegal; 4) Any move around someone facing the same direction as the mover is illegal; 5) Only one Scout at a time may move.

- Willow in the Wind
  - Method: Have 8 to 10 Scouts stand shoulder to shoulder in a circle with one Scout (the “faller”) standing rigid (arms crossed with elbows on chest and fingertips at shoulders) in the center. Remaining rigid, the faller falls slowly in any direction. Before the faller moves very far off center, the people in the circle redirect the faller’s body to another arc of the
Circle. This fall-catch-push sequence continues in a gentle fashion until the faller is relaxed (but remaining rigid) and the people in the circle have gained confidence in their ability to work together toward handling the occasional weight shift of the faller. Change positions so that everyone who chooses can be the faller.

- **Cookie Factory**
  - **Method:** With hands outstretched, a participant dives upward and forward, facedown, into the hands and arms of two lines of spotters. After the catch, the spotters juggle/roll the faller faceup and lower the person's feet to the ground, gently raising the faller to a standing position.
  - **Notes:** Spotters should alternate the positioning of their hands with the hands of spotters facing them. Have participants use proper commands. Make sure the area is free of obstructions.
  - **Variations:** After rolling the faller onto his or her back, spotters "convoyer belt" the faller down the spotting line, with spotters moving to the front of the line after the faller's feet have passed them.

- **Everybody Up**
  - **Method:** Have two Scouts of approximately the same size sit on the ground facing each other so that the bottoms of their feet are touching, their knees are bent, and they are tightly grasping each other's hands. Challenge the pair to pull themselves into an upright standing position without touching the ground with their hands. If the pair succeeds (most will), ask the two to include another participant and try standing up with three Scouts, then four, etc., until everyone in the group has been included in making an attempt.
  - **Variation:** Try the same activity with Scouts sitting back to back with their arms linked.
